1 **I. INTRODUCTION**

2 Google’s motion to strike lacks merit. Google asks the Court to strike broad swaths of  
3 Ms. Kwasizur’s declaration as hearsay without identifying any specific hearsay issue. Google  
4 also asks the Court to strike statements made by, relied upon, or offered by Ms. Kwasizur that are  
5 nearly *identical* in form, subject, and scope to statements made by, relied upon, or offered by  
6 Google’s proffered declarants. Finally, Google asks the Court to strike as “unsupported”  
7 declaration statements based on Ms. Kwasizur’s testimony at trial—testimony that Google fails to  
8 even acknowledge, much less address.

9 The Court should deny Google’s motion in its entirety.

10 **II. LEGAL STANDARD**

11 ***Personal knowledge.*** Under Rule 602, a lay “witness may testify to a matter only if  
12 evidence is introduced sufficient to support a finding that the witness has personal knowledge of  
13 the matter. Evidence to prove personal knowledge may consist of the witness’s own testimony.”  
14 Fed. R. Evid. 602. A declarant’s “[p]ersonal knowledge can be inferred from [the] affiant’s  
15 position.” *Self-Realization Fellowship Church v. Ananda Church of Self-Realization*, 206 F.3d  
16 1322, 1330 (9th Cir. 2000). And where “[p]ersonal knowledge can be inferred from a declarant’s  
17 position within a company or business,” the party seeking to strike must “offer[] ... evidence that  
18 rebuts the inference of personal knowledge flowing from [the declarant’s] position.” *Edwards v.*  
19 *Toys “R” Us*, 527 F. Supp. 2d 1197, 1201-02 (C.D. Cal. 2007) (citing *In re Kaypro*, 218 F.3d  
20 1070, 1075 (9th Cir. 2000), *inter alia*).

21 ***Hearsay.*** Hearsay is “a statement that” “the declarant does not make while testifying at  
22 the current trial or hearing; and [that] a party offers in evidence to prove the truth of the matter  
23 asserted in the statement.” Fed. R. Evid. 801(c).

24 ***Lay opinion testimony.*** “If a witness is not testifying as an expert, testimony in the form  
25 of an opinion is limited to one that is: (a) rationally based on the witness’s perception; (b) helpful  
26 to clearly understanding the witness’s testimony or to determining a fact in issue; and (c) not  
27  
28

1 based on scientific, technical, or other specialized knowledge within the scope of Rule 702.” Fed.  
2 R. Evid. 701.

3 ***Motions to strike.*** Because “motions to strike are generally disfavored,” “any doubt as to  
4 the propriety of a statement should be resolved in favor of the party opposing the motion.”  
5 *Interwoven, Inc. v. Vertical Computer Sys.*, No. CV 10-04645 RS, 2013 WL 3786633, at \*11  
6 (N.D. Cal. July 18, 2013).

### 7 **III. ARGUMENT**

#### 8 **A. Google’s Overbroad Motion To Strike Alleged Hearsay Should Be Denied.**

9 Google asks the Court to strike Paragraphs 7, 9, 10, and 17 of the Kwasizur Declaration,  
10 arguing that each of these paragraphs is “based on hearsay derived from news articles and  
11 statements of an out-of-court declarant.” Mot. 2. Google argues that the Court should strike this  
12 testimony because it “is ‘necessarily derive[d] from the contents of documents or the statements  
13 of out-of-court-declarants,’” and that Rule 602 “prevent[s] a witness from testifying to the subject  
14 matter of a hearsay statement, as he has no personal knowledge of it.” *Id.* (quoting *Allen v.*  
15 *Honeywell Ret. Earnings Plan*, No. CV-04-424-PHX-ROS, 2005 WL 8160551, at \*3 (D. Ariz.  
16 July 27, 2005)). But Google seeks to strike whole paragraphs without even identifying the  
17 alleged hearsay within those passages. To the extent that Google bothers to identify any specific  
18 statements with which it takes issue, it makes an unsupported assumption that the statements are  
19 being offered for the truth of what is asserted. And while Google challenges Ms. Kwasizur’s  
20 quotation of Congressional testimony, Google has already effectively admitted the accuracy of  
21 the relevant statements from the testimony in question—making any “hearsay” issue moot.

22 In paragraph 7 of her declaration, Ms. Kwasizur explains that “multiple news outlets and  
23 consumer review sites directly compare Sonos and Google products.” She then provides three  
24 examples of articles that make that comparison. But Ms. Kwasizur’s own observation that third  
25 parties *make* a comparison is not an out-of-court statement offered for the truth of the matter  
26 asserted—it is a statement by the declarant about what other parties *do*. And to the extent that  
27 Google’s objection and argument turns on *one* quote from the three articles asserting that Google  
28

1 and Sonos *do in fact* compete, Google’s motion to strike is overbroad. *See, e.g., Brigadier*  
 2 *Roofing, Inc. v. Roofers’ Unions Welfare Tr. Fund*, No. 14 CV 10496, 2017 WL 2834533, at \*2  
 3 (N.D. Ill. June 30, 2017) (“This motion to strike is overbroad and denied.”); *Lankford v. Taylor*,  
 4 No. CV-17-02797-PHX-DWL, 2020 WL 6395294, at \*3 (D. Ariz. Nov. 2, 2020) (denying motion  
 5 in limine “because it is overbroad”). Indeed, Google identifies no hearsay problem whatsoever  
 6 with Exhibits B or C to Ms. Kwasizur’s declaration, and only identifies one purportedly  
 7 problematic statement from Ex. D.<sup>1</sup> *See* Mot. 2 (taking issue with statement that “Google’s Nest  
 8 Audio product is ‘Google’s clearest attempt at a Sonos competitor yet’”). Google is wrong about  
 9 that statement too—Sonos offers it not for the truth of the (at most) *implied* statement that  
 10 “Google competes with Sonos” but rather as an example of a third party making a comparison  
 11 between Google and Sonos products.

12 Google identifies no specific hearsay statements in paragraph 9, and that paragraph  
 13 contains no hearsay for the same reason as paragraph 7.

14 Nor does Google identify any specific hearsay statements in paragraph 10. Once again,  
 15 Google’s motion to strike is overbroad and must be denied. For example, paragraph 10 states: “In  
 16 my experience, and as evidenced by the news and product articles just discussed, customers  
 17 directly compare Sonos and Google products.” This is a statement about what customers *do*—  
 18 directly compare these products—not a statement offered for the truth of the implicit statement  
 19 that Sonos’s and Google’s products are in fact directly comparable.

20 Google next takes issue with paragraph 17’s citation of Congressional testimony offered  
 21 by Sonos’s Chief Legal Officer, Eddie Lazarus. Google complains about Ms. Kwasizur’s citation  
 22 of Mr. Lazarus’s statement regarding “Google’s strategy ... to sell products below cost” and  
 23 related statements about Google’s loss leader strategy. Google argues that even if a hearsay  
 24

---

25  
 26 <sup>1</sup> And in fairness to Sonos, Google cannot now use its reply brief to identify for the first time  
 27 hearsay objections or specific allegedly problematic statements that it could have raised in its  
 28 opening brief but chose not to. *See* Tr. 1787:16-1788:13 (Court explaining what constitutes  
 improper “sandbagging”).

1 exception applies, the testimony “would still be improper” because these “sweeping and  
2 conclusory accusations ... are wholly unsubstantiated.” Mot. 2.

3 Google’s disagreement with the substance of Mr. Lazarus’s testimony is not a basis to  
4 strike a declaration that quotes from the testimony. Google argues, for example, that these  
5 “statements do not identify facts and should also be stricken” for that reason. Mot. 3 (citing L.R.  
6 7-5(b)). But even *if* this provision applied to a declaration’s *quotation* from Congressional  
7 testimony as opposed to a declarant’s *own* statements—a leap that Google doesn’t bother to  
8 support—Google offers no authority interpreting Local Rule 7-5(b) to permit striking facts from a  
9 declaration simply because the other party disagrees with them.

10 Regardless, Mr. Lazarus’s testimony (and Ms. Kwasizur’s declaration) is accurate, as  
11 confirmed by the trial evidence and Google’s *own* post-trial filings. For example, Mr.  
12 Malackowski offered unrebutted testimony at trial that “these products are often what we  
13 considered a loss leader”; explaining that “they can be sold at an amount that doesn’t generate a  
14 net profit” “in order to capture that home,” as “part of the strategy of this business.” Tr. 1120:7-  
15 15. Google—in opposing Sonos’s request for injunctive relief—purports to rebut Mr.  
16 Malackowski’s loss leader testimony, but in doing so only *confirms* Google’s loss leader strategy.  
17 Google admits that “Google’s financial records demonstrate that it loses money on sales of some  
18 accused products.” Dkt. 829 at 4. That is agreement, not rebuttal. Google also offers a current  
19 employee, Mr. Chan’s, statement that Google (1) prices the products “at [a] lower price point,”  
20 but (2) does not price the accused products below cost. *Id.* at 5. But Mr. Chan clarifies that he  
21 means only that Google does not set the MSRP below the *manufacturing cost*, Dkt. 829-1 ¶ 6,  
22 ignoring Google’s other costs, such as product development, software engineering, and  
23 marketing. And Mr. Chan does not even attempt to dispute that Google does not generate a profit  
24 on these products, or that Google intentionally prices the product at an artificially low price to  
25 attract customers to the Google ecosystem—i.e., the substance of Mr. Malackowski’s still  
26 unrebutted trial testimony.

1 Because Google has not rebutted Mr. Malackowski’s testimony and has, in responding to  
 2 that testimony, admitted that Mr. Malackowski was right, Google’s motion to strike is moot with  
 3 respect to these statements, because their equivalent are already part of the record for purposes of  
 4 trial and post-trial briefing.

5 And Google’s motion to strike is inappropriate for another reason as well. The Court has  
 6 made clear to the parties—and to Google in particular—that it is improper to “move[] to strike  
 7 not out of prejudice but to secure an advantage,” describing this practice as “emblematic of the  
 8 worst of patent litigation.” Dkt. 565 at 19. *See also id.* at 18 (partially granting Sonos’s motion  
 9 to strike and denying Google’s motion to strike “in its entirety”). And the Court has warned  
 10 Google about advancing objections just for the sake of objecting. Tr. 375:9-376:8 (instructing  
 11 Google to “revise your objections” because “I did go through it on the first one,” and “I would  
 12 say that only about 10 percent deserve to be made”).

13 Notwithstanding this clear direction from the Court, Google has now introduced yet more  
 14 motion practice—indeed, ancillary motion practice *about* motion practice—in order to try to gain  
 15 a strategic edge in opposing Sonos’s request for injunctive relief. Google challenges Sonos’s  
 16 proffered declaration with one hand while offering a fistful of its own news articles with the  
 17 other: Google’s opposition to Sonos’s motion for injunctive relief relies on a declaration that on  
 18 its face has the same issues that Google identifies here. *See, e.g.*, Dkt. 829-2 (exhibiting *thirteen*  
 19 news articles); *cf. also, e.g.*, Dkt. 829-1 ¶ 9 (Mr. Chan opining that “I do not think of Google and  
 20 Sonos as competitors in the smart speaker space”). Unlike Google, Sonos is adhering to the  
 21 Court’s admonitions and is not moving to strike Google’s competing declarations.

22 **B. Google Has Already Admitted That Ms. Kwasizur’s Statements Are Correct**

23 Google moves to strike paragraphs 15 and 16 of Ms. Kwasizur’s declaration as not based  
 24 on her personal knowledge. Once again, Google’s motion to strike is both overbroad and beside  
 25 the point, quibbling with statements regarding facts that Google has already admitted.

26 Ms. Kwasizur, the General Counsel of Sonos, has personal knowledge of the statements  
 27 made in her declaration. For example, Google seeks to strike—as not based on personal  
 28

1 knowledge—Ms. Kwasizur’s statement that Google’s “lower-priced speaker offerings can  
 2 adversely impact Sonos’s ability to counter ongoing price erosion that frequently affects  
 3 consumer products.” Mot. 3 (moving to strike ¶ 15 in its entirety); Dkt. 830-2 ¶ 15. Similarly,  
 4 Google seeks to strike Ms. Kwasizur’s statement that “Sonos places a strong emphasis on quality  
 5 and privacy, focusing on using customer data to enhance their experience rather than aggressive  
 6 monetization of customer data.” Mot. 3 (moving to strike ¶ 16 in its entirety); Dkt. 830-2 ¶ 16.  
 7 But Google offers literally no argument or explanation as to why the General Counsel of Sonos  
 8 would not have personal knowledge of Sonos’s commitment to quality and privacy or to Sonos’s  
 9 pricing strategy. *See, e.g., Allen*, 2005 WL 8160551, at \*3 (“personal knowledge may be inferred  
 10 from the context of the affidavit and the affiant’s position” (citing *Barthelemy v. Air Line Pilots*  
 11 *Ass’n*, 897 F.2d 999, 1018 (9th Cir. 1989)). And Google offers no “evidence” to “rebut[] the  
 12 inference of personal knowledge flowing from [Ms. Kwasizur’s] position.” *Edwards*, 527 F.  
 13 Supp. 2d at 1201-02.

14 Google appears to only actually take issue with Ms. Kwasizur’s statements regarding  
 15 Google’s pricing strategy and business, identifying two statements that Google says must be  
 16 struck. First, Google takes issue with Ms. Kwasizur’s statement that “Google seeks to monetize  
 17 their customers through the sale of additional services, rather than the speakers themselves.” But  
 18 as explained above, Google has *admitted* in this case that (1) it does not sell the accused speakers  
 19 at a profit, (2) that some of the accused speakers are in fact sold at a loss, and (3) that the  
 20 remaining speakers are not sold at a loss—if and only if Google excludes from that analysis every  
 21 single cost *except* for manufacturing cost. In other words, Google is wasting the Court’s and  
 22 Sonos’s time by seeking to strike a statement that Google has already admitted, and which is  
 23 already the subject of unrebutted trial testimony by Mr. Malackowski; here too the Court may  
 24 deny Google’s motion to strike as moot.

25 Second, Google takes issue with Ms. Kwasizur’s statement that Google engages in  
 26 “aggressive monetization of customer data.” Mot. 3. But once again, Google does not actually  
 27 dispute the substance of this statement. Google purports to rebut this statement, but offers only a  
 28

1 narrow, carefully worded statement from Mr. Chan, who states that “Google does not *sell* any  
 2 customer data that it *may* collect from its smart speakers.” Dkt. 829-1 ¶ 8 (emphasis added).  
 3 Google’s declaration does not dispute that Google uses customer data to generate revenue,  
 4 contending only that Google does not *sell* customer data.<sup>2</sup> And Google does not even offer the  
 5 Court any definitive statement as to whether and what kind of data it *does* collect, hiding the ball  
 6 with the statement “any customer data that it *may* collect.” Similarly, Mr. Chan also states that  
 7 “Google does not display or play” *its own* “advertisements on its smart speaker products,” Dkt.  
 8 829-1 ¶ 7, but does not substantively contest that Google monetizes customer data in other ways.  
 9 This is not the stuff of rebuttal; this is an acknowledgement that Ms. Kwasizur’s statement is  
 10 materially correct.

### 11 C. Ms. Kwasizur Does Not Offer Expert Opinion

12 Finally, Google moves to “strike portions of paragraph 13 and 14 and the entirety of  
 13 paragraphs 11, 15, and 23 as impermissible expert opinion.” According to Google, Ms. Kwasizur  
 14 has failed to limit her opinion testimony to that which is “rationally based on [her] perception,”  
 15 under Rule 701. But Google’s objections are nearly coterminous with Google’s arguments about  
 16 the *weight* and *meaning* of certain evidence that Sonos points to in its motion for injunctive relief.  
 17 Google thus “move[s] to strike not out of prejudice but to secure an advantage,” Dkt. 565 at 19,  
 18 and the Court should reject Google’s tactic.

19 ***First***, Google argues that Ms. Kwasizur “attempts to give improper expert testimony  
 20 regarding the behavior of consumers” with respect to the lock-in and ecosystem effect. Mot. 4.  
 21 Google highlights Ms. Kwasizur’s statement that “if Sonos loses out on an initial sale of a speaker  
 22 product to a new household, then Sonos likely loses out on the sale of at least three devices to that

---

23 <sup>2</sup> And even this statement by Mr. Chan is so qualified that it does not actually appear to rebut  
 24 Mr. Malackowski’s trial testimony that Google “generate[s] revenue from advertising and sale of  
 25 data.” Tr. 1096:12. Google chose to save its “rebuttal” evidence for its post-trial declaration,  
 26 knowing that Sonos would not have an opportunity to probe Mr. Chan’s statements, and fought—  
 27 through pretrial motion practice—to exclude the revenues that could have shed light on this  
 28 question. *See, e.g.*, Dkt. 616-3 at 4-7 (“The Court Should Exclude References To Financial  
 Information For Unaccused Products Under FRE 402 and 403.”); *id.* at 5 (specifically taking  
 issue with Sonos’s allegation that Google’s infringement “has paved the way for Google to  
 generate billions of dollars in revenue” from “advertising, data collection, and search”).

1 household” and then complains that Ms. Kwasizur has not “explained how statements regarding  
 2 the likelihood that Sonos will lose sales of multiple devices is based on her ‘perception’ as a lay  
 3 person.” Mot. 4. But Ms. Kwasizur testified at trial,<sup>3</sup> without objection and where Google had  
 4 the opportunity to cross examine her, that Sonos determined that “if one customer buys one Sonos  
 5 [speaker], we know from our data that on average they buy 2.9 or 3 more products.” Tr. 1019:23-  
 6 24. As she explained, “I think you heard the Google [in-house attorney] Mr. Kowalski in the  
 7 video say he has eight; right?” Tr. 1019:25-1020:1. Elaborating, Ms. Kwasizur noted that “when  
 8 we look at households, you know, we do look at how much our customers buy and how likely  
 9 they are to buy another Sonos product or another one; or even -- even if you bought this one  
 10 product, you are probably more likely to buy this, you know, home theater thing. Like, we tend to  
 11 look at it in the aggregate as households. So, like I said, on average one customer buys I think it’s  
 12 up to 2.98 is the latest stat on how you know what the repeat trends are ....” Tr. 1021:12-20.<sup>4</sup>

13 Google also complains that “Ms. Kwasizur has not laid any foundation as to how her  
 14 testimony regarding the ‘likely’ behavior of consumers who purchase Google speakers or the  
 15 effect of Google’s product prices on Sonos’s speaker products is based on ‘first-hand knowledge  
 16 or observation.’” Mot. 4 (quoting *Tyco Thermal Controls LLC v. Redwood Industrials*, No. C 06-  
 17 07164 JF (PVT), 2010 WL 1526471, at \*4 (N.D. Cal. Apr. 15, 2010)). Let’s take a look at some  
 18 of the offending statements. For example, Google takes issue with Ms. Kwasizur’s statement that  
 19 “I am aware that customers chose Google over Sonos based on price, integration with other  
 20 Google smarthome devices, and brand familiarity.” Dkt. 830-2 ¶ 11. Does anyone even doubt  
 21 any part of this statement? Google’s own witness Mr. Chan makes near-identical statements in  
 22

23 <sup>3</sup> See, e.g., Fed. R. Evid. 602 (“Evidence to prove personal knowledge may consist of the  
 24 witness’s own testimony.”).

25 <sup>4</sup> Google’s argument that Sonos is “now attempt[ing] to re-assert” “its lost profits theory”  
 26 “through conclusory statements by Ms. Kwasizur” is equally baseless. Sonos does not seek  
 27 damages based on lost profits. But the fact that Google’s monopolistic and predatory pricing  
 28 threatens Sonos’s profits is hardly a secret—it is the entire reason for this litigation. And as  
 discussed in Sonos’s reply in support of its motion for injunctive relief, Google’s legal  
 argument—that injunctive relief *requires* a showing of lost profits—is not supported by the legal  
 authorities on which Google relies. Dkt. 836 at 3, 7.

1 his competing declaration, stating that he “do[es] not think of Google and Sonos as competitors in  
 2 the smart speaker space,” apparently based on the distinction that “*Google sells its speakers and*  
 3 *devices at a lower price point than Sonos* and generally attracts customers *who are interested in*  
 4 the intelligence of the Google Assistant *to control their smart homes.*” Dkt. 829-1 ¶ 9. *See also,*  
 5 *e.g.,* Dkt. 829 at 5 (Google arguing that it “sells its products at lower price points” to customers  
 6 who want to use “Google Assistant to control their smart homes” while “Sonos prices its  
 7 premium products at higher price points”). Google identifies literally no reason why Ms.  
 8 Kwasizur, the general counsel of Sonos, would not have personal knowledge of Google’s sales  
 9 advantages on pricing, smart-home integration, and brand familiarity.<sup>5</sup> *See Allen*, 2005 WL  
 10 8160551, at \*3 (“personal knowledge may be inferred from the context of the affidavit and the  
 11 affiant’s position”). You don’t need a Ph.D. in economics to know that Google is a more  
 12 universally recognized brand than Sonos. *See, e.g.,* Dkt. 829 at 6 (*Google* quoting TX158 for the  
 13 proposition that “[b]rand is a strong influencer on choice and Google does well”); Tr. 1034:20-  
 14 21 (Court describing Google as “the biggest company in the world”). Indeed, jury selection was  
 15 complicated in this matter because of the sheer number of potential jurors who, for example,  
 16 owned Google stock. *See, e.g.,* Tr. 111:23-113:8, 116:15-25, 117:9-16, 119:12-16, 119:22-120:3.

17 Google similarly takes issue with Ms. Kwasizur’s statements regarding the lock-in effect,  
 18 *e.g.,* “when a consumer purchases a Google smart speaker, such as a Nest Audio, it is more likely  
 19 that subsequent smart speaker purchases from that same consumer would be of Google smart  
 20 speaker devices, as opposed to smart speaker devices of another brand, such as Sonos.” Mot. 4;  
 21 Dkt 830-2 ¶ 13. Once again, this statement is at the very least reasonably supported by Ms.  
 22 Kwasizur’s trial testimony regarding the data for repeat purchasers of Sonos products, *see supra*.  
 23 Nothing in the trial record suggests that that repeat purchaser dynamic would *not* be analogous for  
 24 purchasers of Google products.

25 Google also relies upon legal authority that is entirely inapposite. *See* Mot. 4 (citing *Tyco*,  
 26 2010 WL 1526471, at \*4). In *Tyco*, the declarant was a paralegal at a law firm who “work[ed] on

27 <sup>5</sup> Google offers no evidence rebutting the presumption of her personal knowledge, either.

litigation matters involving Monsanto” and before that had been a paralegal at Monsanto from 1981 to 1987. 2010 WL 1526471, at \*3. Tyco argued that “as a result of [the paralegal’s] experience as a Monsanto employee from August 1981 to August 1997 and her current employment at a firm that represents Monsanto, Belleau developed personal knowledge about Monsanto shipping records and their significance.” *Id.* But as the court noted, the paralegal’s “employment at Monsanto did not begin until August 1981, many years after the end of the period relevant to the instant case,” putting her in no position to have “‘first-hand knowledge or observation’ required to explain the significance of shipping records dated from 1958 to 1971.”<sup>6</sup> *Id.* at \*4. Here, by contrast, Ms. Kwasizur has been employed at Sonos during the entire period of Google’s competition with Sonos and infringement, and she participated in licensing discussions that went into granular detail on Google’s product line of speakers during the period 2016 to 2019. *See generally* Dkt. 705.

**Second**, Google seeks to strike—as improper expert opinion—Ms. Kwasizur’s statements regarding the ability of Sonos and other market participants to meet demand if the Court enjoins Google’s infringement. Mot. 4-5. But as an executive at Sonos, Ms. Kwasizur naturally has knowledge of Sonos’s manufacturing and supplier capacity. Ms. Kwasizur, who has been employed at Sonos since 2013, explained that “selling audio products” is the core of Sonos’s business, and “[e]very Sonos employee works on speaker-related technology or supports Sonos’s speaker business in some way.” Dkt. 821 ¶¶ 1, 3-4. As she explained, “[h]ardware sales are Sonos’s primary source of revenue.” *Id.* ¶ 5. Ms. Kwasizur thus has general knowledge on Sonos’s sales of speakers, including those that compete with Google.

Google specifically takes issue with Ms. Kwasizur’s statement that “Sonos has the manufacturing and supplier capacity to make up for much of the demand for Google’s media players,” suggesting that Ms. Kwasizur has no first-hand knowledge of this and arguing that

---

<sup>6</sup> Similarly, in another case on which Google relies, the court in *Allen* struck—for lack of personal knowledge—a declaration paragraph describing the activities of the Honeywell retirement plan in 1983 where the declarant “has been the Honeywell plan administrator since only 2000.” 2005 WL 8160551, at \*2-3.

1 “there are several accused products for which Sonos makes no similar product.” Mot. 4. But  
 2 Ms. Kwasizur did not say that Sonos alone could make up *all* of the demand, and indeed  
 3 specifically identified other large players in the market that could make up any demand that  
 4 Sonos could not, *see infra*.

5 Google also objects to this statement in paragraph 23: “Although Sonos experienced  
 6 manufacturing and supply shortfalls early in the COVID-19 pandemic, at this time Sonos can  
 7 ramp up its capacity to meet increased need for smart speaker products.” It is unclear on what  
 8 basis Google even objects to this statement. Ms. Kwasizur describes the fact that Sonos  
 9 experienced constraints early in the pandemic, but explains that those constraints no longer  
 10 prevent Sonos *in 2023* from “ramp[ing] up its capacity to meet increased need.” This is precisely  
 11 the type of high-level information on capacity and supply chain issues that a reasonable person  
 12 would expect an executive of a publicly traded company to be aware of. *See* Rule 701(a) (“If a  
 13 witness is not testifying as an expert, testimony in the form of an opinion is limited to one that is:  
 14 (a) rationally based on the witness’s perception.”); *Allen*, 2005 WL 8160551, at \*3; *Edwards*, 527  
 15 F. Supp. 2d at 1201-02. Google identifies no *reason* to think that Ms. Kwasizur would not be  
 16 aware of these facts, no specific *testimony or evidence* undercutting her statement, nor any *legal*  
 17 *authority* precluding this type of lay testimony from a witness analogous to Ms. Kwasizur. Those  
 18 failures require the Court to deny Google’s motion.

19 Google separately takes issue with Ms. Kwasizur’s statement that “Amazon and Apple  
 20 also produce comparable speakers that could satisfy consumer demand for smart speakers.”  
 21 Mot. 4-5. It is unclear why Google thinks that this is a matter for expert opinion when *Google*  
 22 *itself* argues that Amazon has “implement[ed] the [accused] feature,” Dkt. 829 at 12, and that  
 23 “Amazon has the ‘dominant share of the U.S. market for smart speakers,’” *id.* at 5. Google’s own  
 24 assertions both (1) make clear that Ms. Kwasizur’s statement is *correct* as a factual matter and  
 25 (2) belie Google’s argument that Ms. Kwasizur’s statement is “based on *scientific, technical, or*  
 26 *other specialized knowledge* within the scope of Rule 702.” Rule 701(c) (emphasis added). And  
 27  
 28

Google does not dispute that the “accused products for which Sonos makes no similar product” have analogues made by Amazon and Apple.

In sum, Google argues that “Ms. Kwasizur is not an economist qualified to discuss supply and demand in the smart speaker market, nor does she purport to have personal knowledge of Sonos’s manufacturing capacities.” Mot. 5 (citing *Fresenius Med. Care Holdings, Inc. v. Baxter Int’l, Inc.*, No. 597, 2006 WL 1330002, at \*3 (N.D. Cal. May 15, 2006)). But Google’s citation to *Fresenius* is inapposite. In that case, a court struck the parts of a fact witness’s declaration in which he offered classic technical expert opinion, including (1) comparing an accused product to the limitations of an asserted patent and (2) opinions on “whether certain components of hemodialysis and/or heart lung machines were well known in the industry” as of the priority date of the asserted patent. Mot. 3, 5. Ms. Kwasizur is not providing testimony at the level of an economic expert, or offering any precise data analysis that would require “specialized knowledge.” Instead, her “conclusions are ... based on h[er] personal observations and knowledge as a result of h[er] position at [Sonos]” and “are not so specific as to require technical or other specialized knowledge in violation of Federal Rule of Evidence 701.” *Interwoven*, 2013 WL 3786633, at \*11. Her declaration is therefore proper under Rule 701. *Id.* Indeed, her personal knowledge is *presumed* as a result of her position, *see supra*, and Google has failed to offer any proof to rebut that presumption.

#### IV. CONCLUSION

The Court should deny Google’s motion to strike.
